

Vials and corresponding caps for laboratory use

Aalborg University, Aarhus University, University of Southern Denmark, Technical University of Denmark, and University of Copenhagen have entered into new framework agreements for the purchase of vials and corresponding caps for laboratory use. The agreement includes common vials and corresponding caps with fixed prices on specific products within the following product groups:

- Screwcap vials
- Screw caps
- Snapcap vials
- Snap caps
- Crimpcap vials
- Alu caps
- Mikroindsats
- Scintillation vials

There are the following 2 suppliers on the framework agreement:

- VWR International A/S
- Th. Geyer Skandinavien ApS

All purchases under the framework agreement must be made via a so-called needs model. This means that all purchases under the framework agreement must be made by direct allocation to the Supplier that most cost-effectively meets the functional research need. The functional research need is based on a research assessment of which product best meets your needs in connection with the specific purchase.

Duration of the agreement

The framework agreements come into force on March 1, 2025, and run until February 28, 2029

PURCHASES UNDER THE AGREEMENT

How to use the agreement:

Purchases must be made in AAU's e-commerce system via catalog.

Here, the prices of the 2 suppliers can be seen on the items in the aforementioned product groups.

Fees for purchases:

When the order has a value of less than DKK 500, the supplier may charge the Customer a minimum order fee of DKK 150.

Delivery conditions

Unless otherwise agreed, delivery must take place on Working Days between 08:00 and 15:00.
